

Many of you are aware of the ongoing construction project on Blue Ridge Road between Western Boulevard and the State Fair Grounds. This project is the solution to the complex intersection of Blue Ridge Road with Beryl Road, Hillsborough Street, and the railroad crossing, and it will also help make the intersection more accommodating and safer for pedestrians.

There are three phases to this project, and Gregory Poole wants to ensure our customers and vendors understand how the next phase will affect access to our Raleigh facilities. The upcoming phase (Phase 2), will have a major impact on our traffic flow between October 2023 and October 2024 as noted below:

Phase 2 will begin after the State Fair, resulting in Beryl Road being closed across Blue Ridge Road. Parts traffic and people visiting the main Beryl Road building will be directed onto Beryl Road from Powell Drive and Western Boulevard. Equipment deliveries will be directed to a new entrance across from Pylon Drive because Blue Ridge Road will be closed between Pylon Drive and the railroad tracks. Our previous equipment delivery entrance will be closed, and equipment will enter our facility across from Pylon Drive (see map for Phase 2 traffic changes).

Phase 2 is scheduled to start on October 25th. We will keep you informed if there are any additional changes or delays. If you have any questions or concerns, please email us at marketing@gregpoole.com and we will be happy to assist. Thank you for your patience as we work through these traffic and entrance adjustments around our main office. The finished project will provide safer intersections and safer traffic flow for our community.

Sincerely,

The Gregory Poole Team
